ABOUT ME

With 7.5 years of experience in software development and leadership, I am actively pursuing remote Full Stack/Backend developer roles.

Based in Tokyo, I bring expertise in building scalable and efficient AWS serverless applications, complemented by in-depth knowledge of Looker as both a developer and a user. I also hold an AWS certification and possess extensive experience with various AWS services.

I am recognized for my strong Japanese work ethic, adaptability, and rapid problem-solving abilities, all underscored by a collaborative mindset and a good sense of humor. As a proven leader and team player, I excel at driving project success while fostering a positive and productive environment.

MAIN STACKS

Typescript | Javascript | Node | PHP Laravel | Python | Express | AWS Lambda | Docker | Looker | DynamoDB | AWS | Serverless | OpenSearch | RDS | MariaDB | Looker | MySQL

MINOR IN

Go | C | C++ | C#

CERTIFICATIONS

AWS Certified Cloud Practitioner   July 10, 2024
- July 10, 2027
